

One stop solution of private digital space

About Project

Myweb app is a private digital space provider app where user can share and save information, record session, and upload video, audio on the go.

Challenges

The major challenge while creating this app is to gain the domain knowledge and try to solve the problem of making data more secure and private. We also did iterative process multiple times to make improvements to the interface.

Goal

Our goal is to create more private & secure data app so that users will get power and freedom and develop more trust toward the application.

Project Overview

Timeline	Screens	Tools	Type	Project
2 Months	146	Adobe XD	B2C	Mobile Application

Features

Provide good space to store a large amount of files.

It also regulates data backups so that stored files are retrievable and never lost.

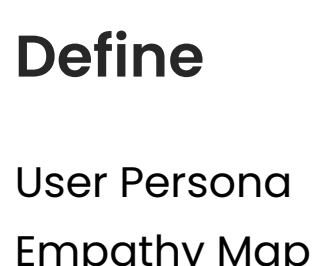

Edit and store over 100 additional file types, including PDFs, CAD files, images, videos and more.

Visual Design

After meticulously crafting every segment according to the client's vision, we gave the shape and colors to the final version of visual design that is ready to serve users while keeping them engaged in its visual aesthetics.

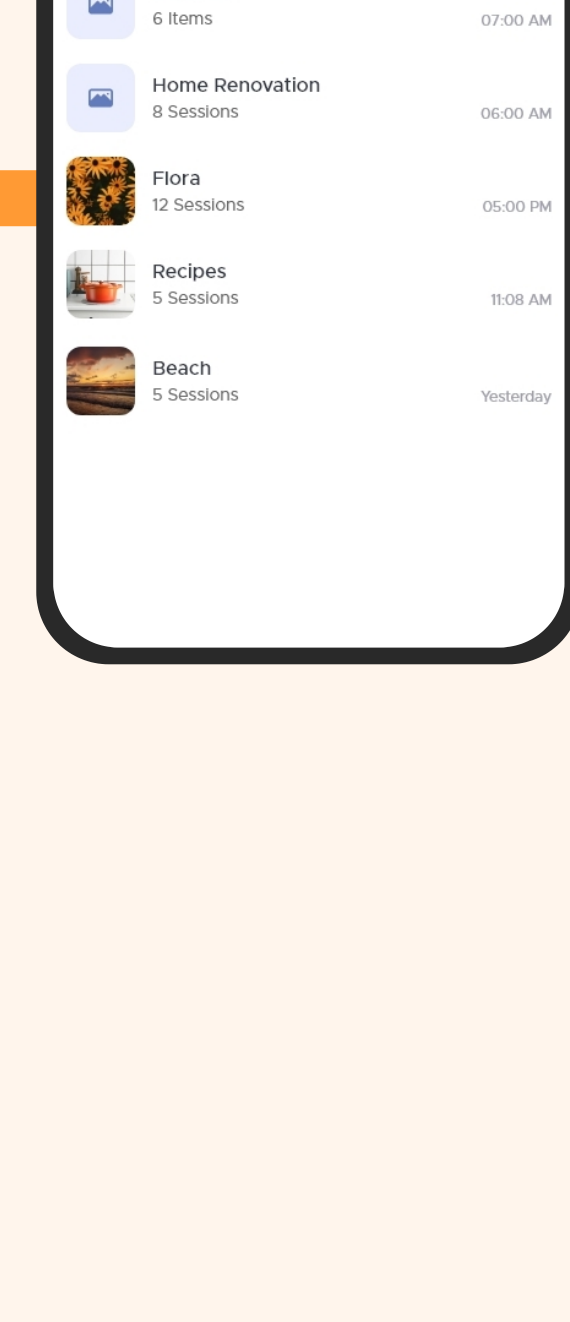

01 Profile Screen

User can change the profile picture, theme and also change the pin of the app to secure his/her account.

02 Space Screen

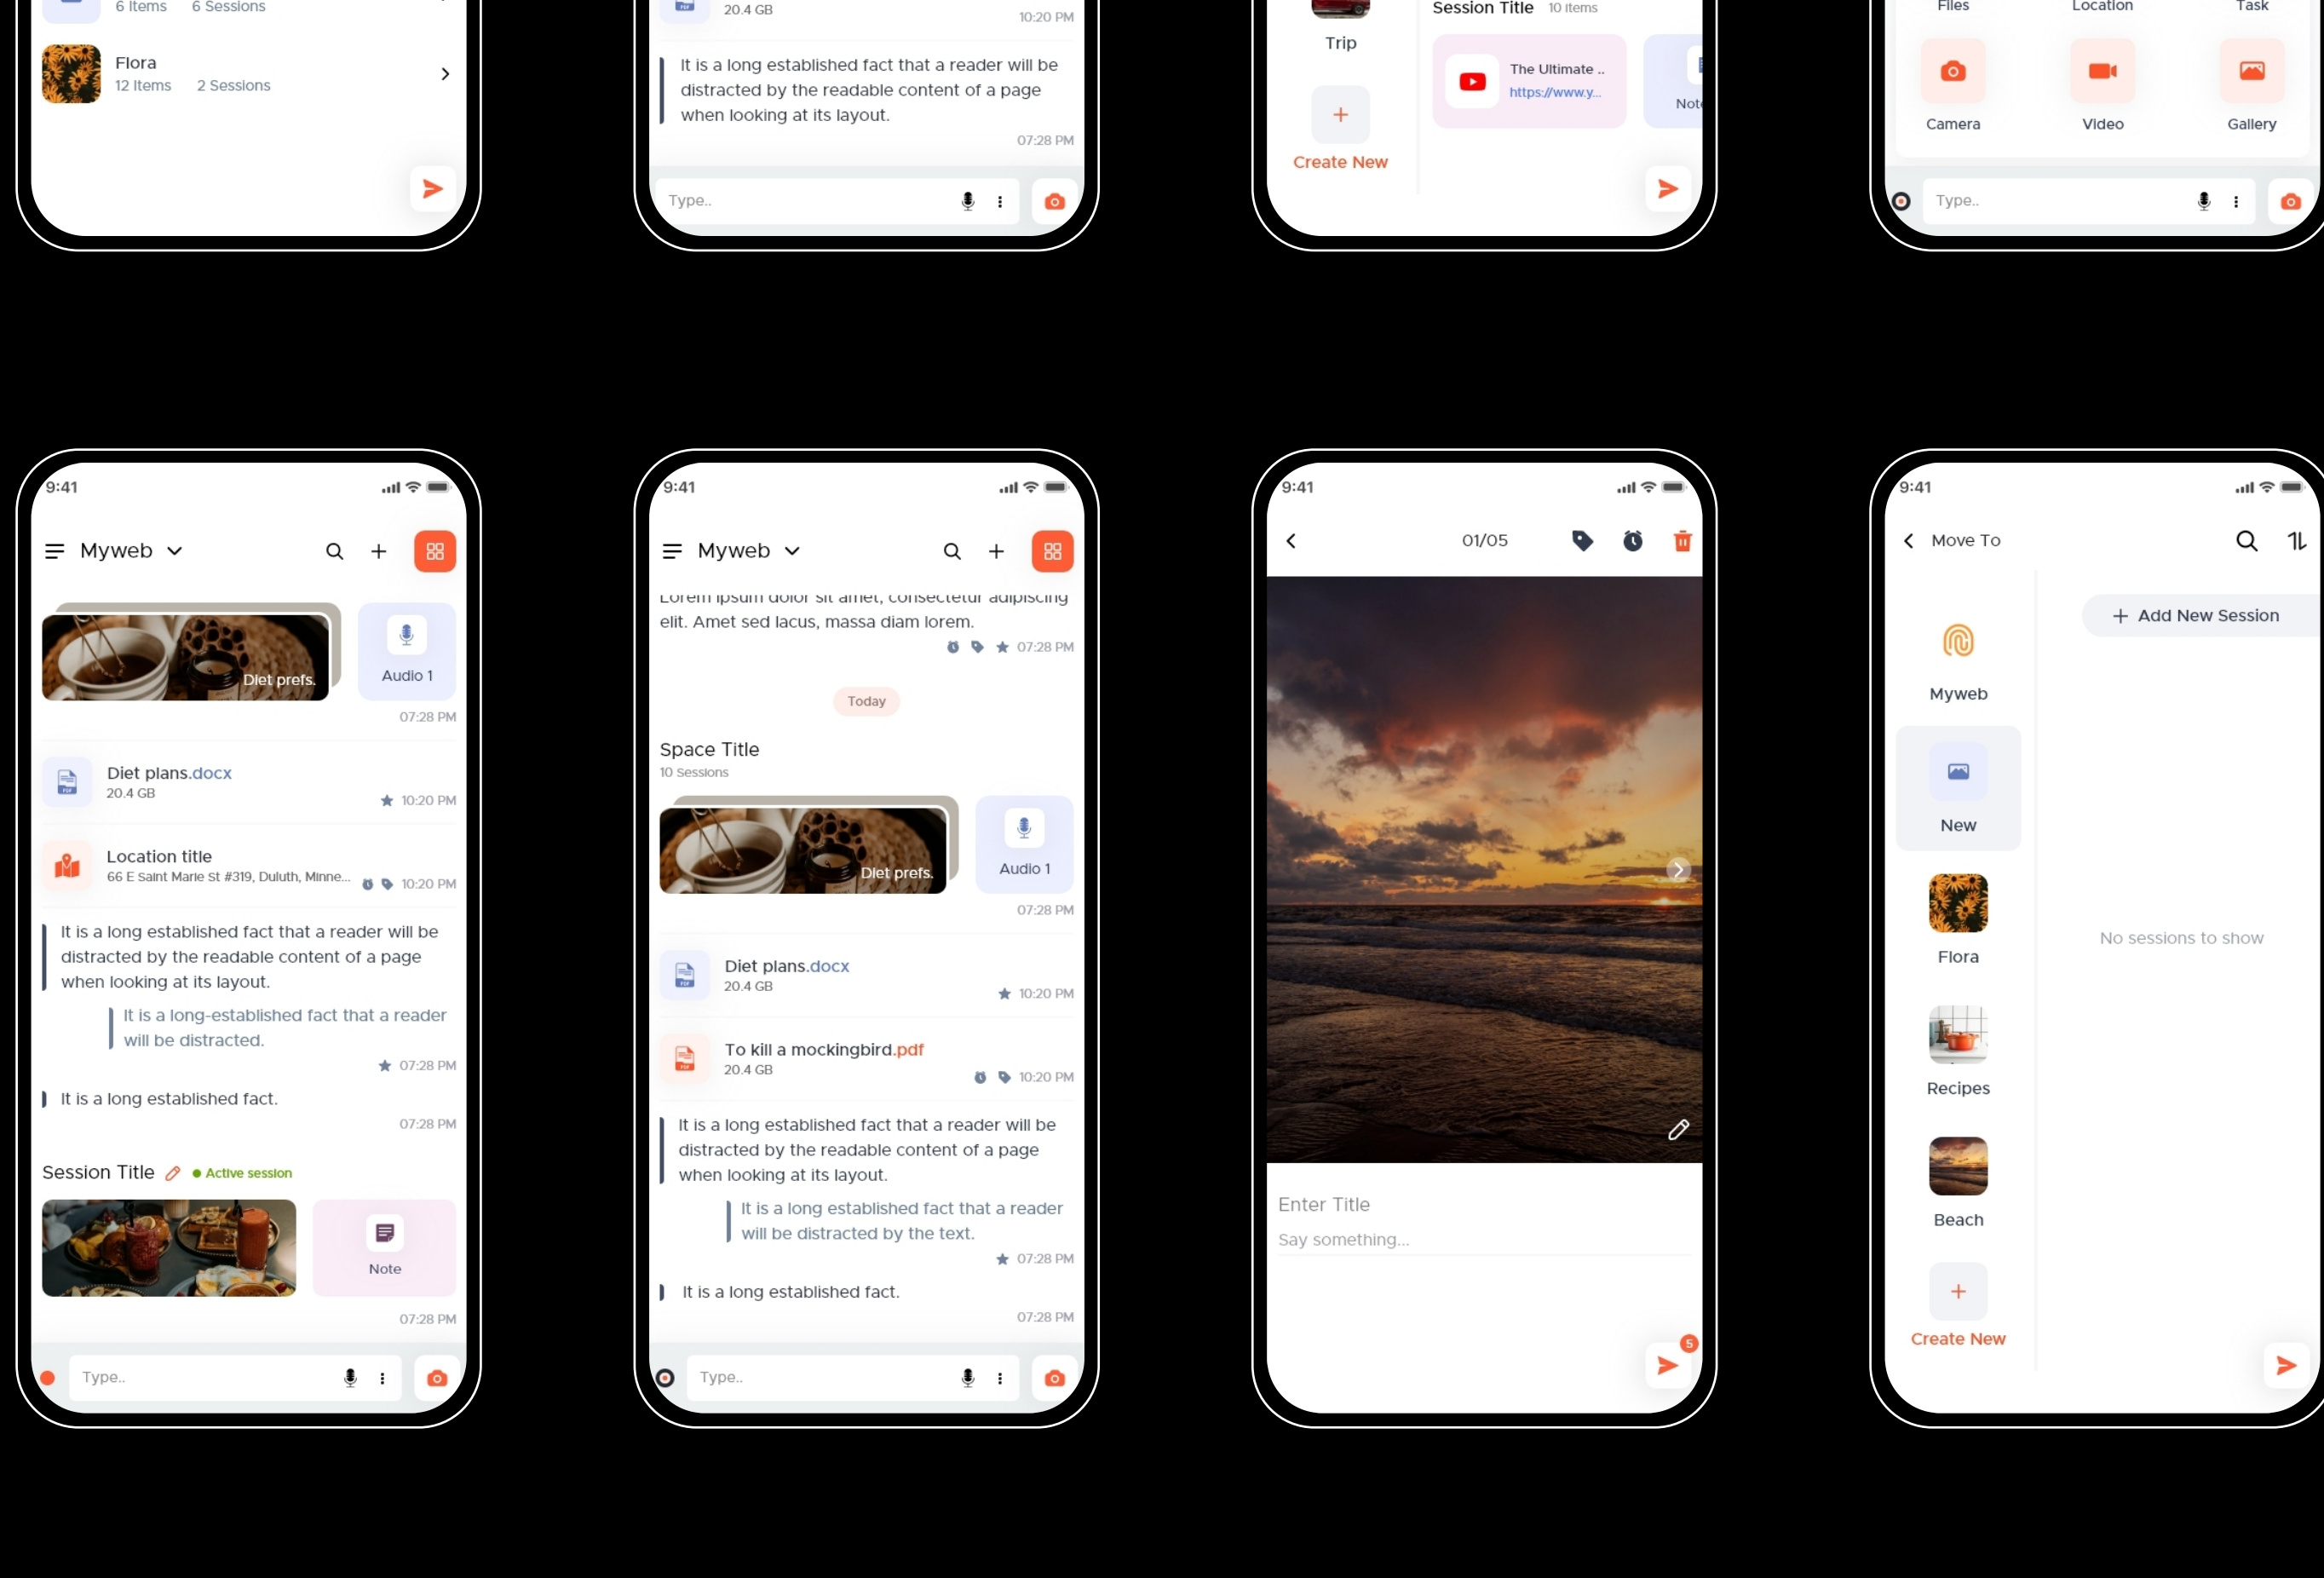

User can change the profile picture, theme and also change the pin of the app to secure his/her account.

03 FAQ Screen

FAQ section provides answers of all the queries related to privacy and security.
